South Jakarta, Indonesia

A recent bachelor graduate with background in information systems and online entrepreneurship who strives to provide the best quality of work to achieve a certain objective on time with excellence. I have hands-on experience in JavaScript, Node JS, Express JS, Mongo DB, and React JS and have been honing my web development and software testing abilities for the past three years. I am capable and passionate of continuous learning from senior developers with a desire to apply skills to a talented engineering team to develop quality solutions.
